This is a radio controlled switch bundle for the switching of mains power to lighting and appliances up to 250W total load power. The Slave switch operates in conjunction with the Master to provide 2-way light switching for example where you want a switch at the top and bottom of a flight stairs for a particular light. Only the Live wire will be switched to the load. Switching is initiated either by radio control or manually by pressing the button on the housing of either of the switches. It is compatible with MiHome Remote Control (MIHO0003) and the MiHome network. The master switch is a receive-only radio device operating in the 433MHz band. The slave operates by direct connection to the master switch.

**In the Box:** Light Switches, Fittings, User Guide

**IMPORTANT:**
The Master and Slave units will NOT operate with any other manufacturer’s switches in a two way configuration. Doing so will permanently damage the switch units.

The slave switch will only operate in conjunction with the MiHome Master switch. The Master switch can operate with two Slave switches.

The switches are not compatible with all commercially available light bulbs. You may notice flicker with some available products.

Please follow the wiring instructions in this document to correctly install the switches. Incorrect connection may damage the switch unit.

**Installation**

These devices operate at UK mains voltage levels and therefore require installation by a competent electrician. It can fit in a 25mm metal pattress or 35mm dry lining pattress box. It will not fit into a 4 lug box.

**SAFETY:**

**Applicable in England and Wales**, where the installation of this product falls under the scope of the Building Regulations requirements Part P, the installation must be carried out by registered competent persons and certified as follows:

a. Self-certification by a registered competent person
b. 3rd-party certification by registered 3rd-party certifier
c. Building control body

For an installation that is not notifiable according to the Building Regulations Part P, work should be designed and installed, and inspected, tested and certificated in accordance with BS 7671.

**Applicable in Scotland**, where the installation of this product falls under the Building (Scotland) Act, a Warrant may be required and advice should be sought from LABSS (Local Authority Building Standards Scotland).

We recommend that a competent qualified person is used for all installations of this product even if the installation is deemed to be minor works and non-notifiable for the purposes of the Building Regulations. Non-notifiable electrical work can present a risk to safety. If qualified electricians carry out the work they should give you a Minor Works Certificate, which means that they have tested the work to make sure it is safe. If you do the work yourself you may wish to engage a qualified electrician to check it for you. Note that it is the owner of the property who has the legal liability for complying with the Building Regulations.

**Pairing**

To control switching remotely, the Master switch must be paired with a controlling device such as the MiHome Remote Control or MiHome Gateway.

**Pairing with MiHome Remote Control**

To set the unit into pairing mode, press and hold the button on the front of the Master light switch housing for 5 seconds or so until the lamp on the front starts to flash at 1 second intervals. **NOTE:** A single press of the button while it is flashing will take it out of pairing mode.

Point the hand controller at the light switch at a range of up to 2m and then press and hold the chosen “ON” button on the remote handset for 2 seconds or so. You should see the lamp on the relay housing flash more quickly for a brief period indicating the pairing has succeeded.

**Pairing with MiHome Gateway**

Select the Light Switch from the list of devices to pair from your MiHome account and follow the on-screen pairing instructions.

**NOTE:** The Master switch can be paired with up to 5 separate controllers – remote controls and Gateways alike. Further attempts to pair will overwrite previous pairings.

**Remote Control Operation**

Once paired with a remote controlling device the Master switch can be switched on and off with that controller. With the MiHome hand controller it can be controlled with the on/off buttons to which it is paired and the all on/off buttons by pressing and holding the chosen “On” or “Off” button on the remote handset for 1 second.

Follow instructions on the MiHome app or MiHome server to control switching of the Master. You can program it to switch with conditions such as events and time of day.

**Manual Operation**

A single short press of the button on the front of the Master or Slave housing will toggle the switch on and off.

**What the push button does**

1. Single short press to toggle power on/off
2. Long press - 5 secs: Learning mode (slow LED flash)

**What the LED indicator lamp means**

1. Red = ON, off = OFF
2. Slow flashing = pairing mode
3. Quick flashing = pairing accepted

**Disposal**

The outer box of the packaging is 70% recycled material from managed forests and is 100% recyclable. Do not dispose of switch with regular household waste. You must take electronic equipment to a local recycling centre to be disposed of in line with current regulations.
Safety
If you do not install and use in line with this guide the warranty will become invalidated and we will not be liable for any damage or loss whatsoever, including indirect loss, damage to property or personal injury. You must only use the product in dry areas indoors, and it must be protected from moisture and water. Do not disassemble as it does not contain any parts to service. If it arrives faulty, return it to where you bought it.

Technical Specification
- Rating: 220 - 240V~ 50Hz, 1A, 250W max.
- Terminal Connections Master: L, L1, SLAVE
- Terminal Connections Slave: L-IN, L-OUT, SLAVE
- Manual control: Push Button
- Indicator lamp: Red LED on master
- Radio: 433.92MHz
- Range: Approx. 15-20m in closed field; 30m in open area
- Operating temp.: -5°C to 40°C
- Storage temp.: -20°C to +60°C
- Housing: White plastic (MIHO043); Black Nickel (MIHO44); Chrome (MIHO45); Brushed Steel (MIHO46)
- Mounting: min. 25mm pattress; 35mm dry lining pattress
- Size (HxWxD): 85 x 85 x 28mm
- Protection class: IP20
- Approvals: EN 60669-2-1, EN301489-1, EN301489-3, EN300220-2
